

CEMPRO
Proudly S.A. bricks

OUR SUPPLY CHAIN

01

★ **MINING OF RAW MATERIAL**

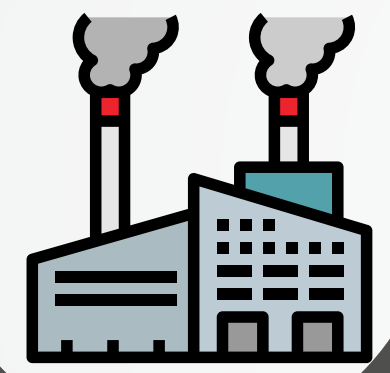

Ore is mined by DGB Joint Venture near Steelport, Limpopo.

02

★ **ORE PROCESSING**

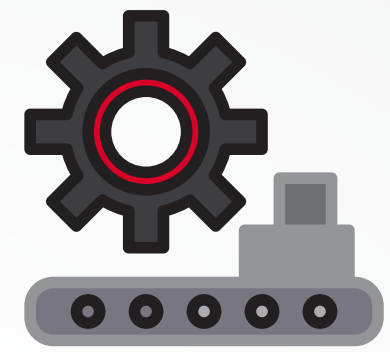

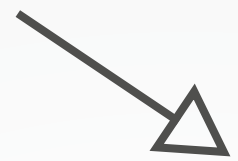

The ore is crushed, washed and separated into chrome concentrate products and tailings.

03

★ **DELIVERY OF TAILINGS, SLAG, COARSE SAND, CEMENT & A CHEMICAL AGENT**

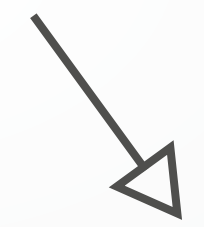

The slag, fine sand (tailings), coarse sand, cement and a chemical agent (key ingredients in the manufacturing of bricks and blocks), are transported to CEMPRO - to be used in the production of bricks and blocks.

04

★ **CEMPRO MANUFACTURING**

CEMPRO receives the raw materials and uses them in the manufacture of stock bricks and blocks. *See separate Infographic* explaining the manufacturing process and the benefits.

05

★ **CEMPRO SALES**

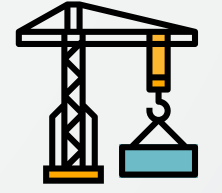

Construction material, as well as our bricks and blocks, are supplied to various industries such as mining, construction and building.
